

System Requirements

The followings are the minimum hardware and system requirements for running the web viewer.

Item	Recommended PC Specification
OS	Windows XP Professional Windows Vista Home Basic/ Premium Windows 7
Web Browser	Internet Explorer 6, 7, 8
CPU	Intel Pentium 2.0 GHz
Memory	512MB
VGA Memory	128MB or more
Monitor	16-bit 1024 x 768 High Color
HDD	50MB (space required for installing the web viewer) ■ Additional HDD space is required for saving your recordings. The file size of your recording may differ depending on the specified quality.

If you encounter no screen image after connected to the web viewer, check the followings

1. Upgrade the current DirectX(9.0 or higher) version with the latest.
2. Check the memory size of your PC's VGA.

If it is below 128 MB, download the patch S/W from the below web page and install it on your PC.

- Korea : <http://www.samsungcctv.co.kr>
- Other countries : <http://www.samsungcctv.com>
- If the problem persists, change the setup setting value to GDI and try again.
