

Wisenet Access Control System

Access control meets video surveillance

The Wisenet Access Control System is an innovative platform for access control in small-to-large buildings. It integrates with Hanwha Vision's video management systems, Wisenet WAVE and SSM, to provide combined video surveillance and access control for a next-generation solution.

WAVE

WAVE Mobile

Monitoring

Monitor access and open doors through a seamless integration with the Wisenet WAVE VMS platform. WAVE displays access-related events in real-time and stores them alongside video surveillance events.

WAVE enables users to open and close doors with a simple click, granting real-time access, while also allowing them to monitor video feeds. Users can review access records and events through the event search feature, and important events can be saved with bookmarking.

Access event log and search

Access event list

- Access granted / denied
- Invalid time schedule
- Invalid password
- Access door error
- Overtime door opened / closed
- Forced door opened
- Anti-passback violation
- Rex switch signal
- Door opened / closed
- Door position switch alarm (Occurred / cleared)
- Input signal occurred / released

Event bookmark

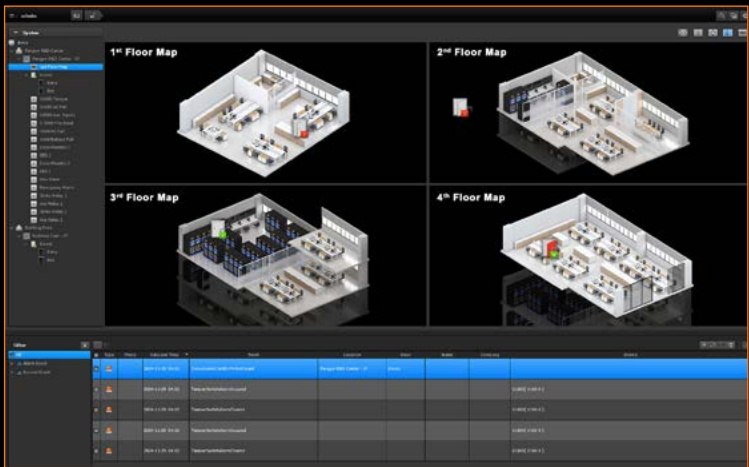

Open and close doors

When an employee or visitor accesses the premises, WAVE can overlay information onto the video feed.

Grant Access Normal

Type: Normal
Data and Time: 2024-07-04 1:35:07 AM
Event: Grant Access Normal
Location: Building - 5F
Door Or Lift: 5F A Zone Door
Name: Michael
Card Number: 02020015
Company: Company
Device: B2(X100A)

Controlled access

Two-card access

Benefits

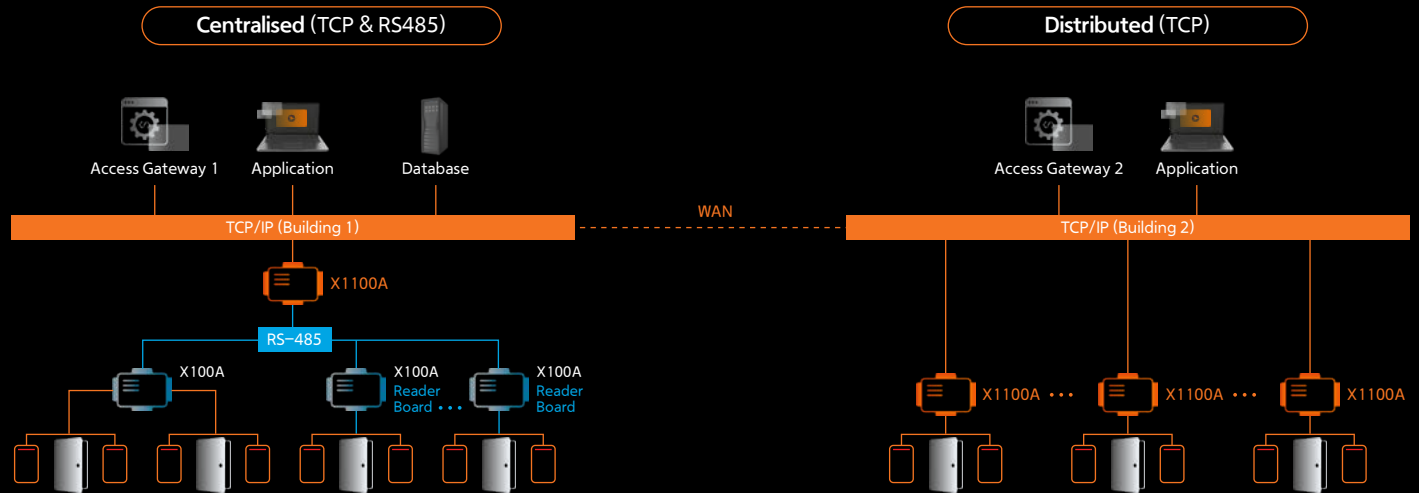

- ✓ Ideal for small-to-large buildings and enterprises
- ✓ Integrated with video surveillance for enhanced security and monitoring
- ✓ Improved incident response and investigation
- ✓ Prevent unauthorised access across a site
- ✓ Real-time monitoring, access control, and alerts
- ✓ Flexible system with viewing options online and mobile

Key Features

- 1 Control access**
Unlock, lock, forced door reset alarm and change system relay features, via an interactive map with the access control and WAVE client software.
- 2 Mustering report**
During emergency events, identify who may still be inside the building.
- 3 Anti-pass back**
Prevents unauthorised access by ensuring users cannot give their card to another person to gain access via the same entry point.
- 4 Interlocking**
Manage the access of two connected doors.
- 5 Two-card access**
Requires more than one authorised person to access an area.
- 6 Lift access control**
Access control for lifts, up to 128 floors.
- 7 Visitor management**
Includes visitor and host information, visit history, check in/out and archive.
- 8 Email on alarm**
Receive events in real time via e-mail.

System overview – distributed and centralised system options

Licence options

A tiered system for licences based on the number of doors required by a business, to meet the needs of all facilities and growing organisations.

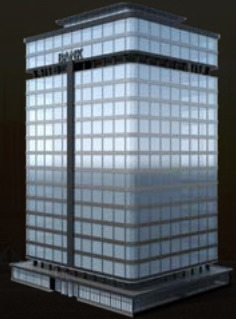

Wisenet Lite
(6 doors)

Wisenet Access Standard
(32 doors)

Wisenet Access Professional
(256 doors)

Wisenet Access Enterprise
(Unlimited)
